

GENERAL RISK ASSESSMENT

PRODUCTION NAME & ADDRESS:

PRODUCTION DATES:

SAFETY ADVISOR:

UNIT PRODUCTION MANAGER OR OTHER PERSON WHO HAS RESPONSIBILITY FOR THE SAFETY PROGRAM:

STEP 1 Identify Hazard	STEP 2 Assess Hazard Risk	STEP 3 Controls	STEP 4 Implement Controls	STEP 5 Observe and Reassess
<i>Fill in identified hazards on locations, stages and other production workplaces.</i>	<i>Perform risk analysis judging the degree of risk based on specific situations, foreseeable conditions, who will be at risk, severity and likelihood (frequency) of the risk.</i>	<i>Using the hierarchy of control pyramid, consider control measures that can be used to mitigate the risks to an acceptable level.</i>	<i>After talking with production and department heads, decide which controls will be used. Determine what will be done, how it will be done and who will implement which controls.</i>	<i>Monitor the controls as production moves forward, preparing to reassess the risk and controls as things change.</i>
